

# ALUMA-BRITE

**PROFESSIONAL BARE ALUMINUM ACID CLEANER**

**RECOMMENDED FOR PROFESSIONAL USE ONLY.**

***Aluma-Brite removes algae, zebra mussels, barnacles, greasy and oily residue, rust and stubborn, black stains from bare aluminum boat hulls and pontoons.***

**DIRECTIONS:** Power wash or hose off loose debris. Spray Aluma-Brite onto surface to be cleaned from bottom to top and not from top to bottom. Ensure cleaner is evenly spread and allow to stand for 30-60 seconds. Agitate with a soft, synthetic brush as required and rinse. If not fully clean, repeat the process. Rinse well. Avoid prolonged contact with engine and drive parts.

**CAUTION:** Since different alloys behave differently, test on an inconspicuous area before cleaning entire boat or pontoon.
