

# DINGHY & FENDER CLEANER

*Dinghy & Fender Cleaner removes black marks, dirt and oxidation from all inflatable boats (PVC, vinyl, hypalon, rubber). It is equally effective for cleaning boat fenders, power cables and rub rails. May not remove embedded abrasions. Dinghy & Fender Cleaner biodegrades readily and is phosphate-free, making it the responsible choice.*

**DIRECTIONS:** Avoid use in direct sunlight. Spray Dinghy & Fender Cleaner onto surface and allow to sit for up to one minute. Scrub with a suitable brush and rinse thoroughly. Repeat if necessary. Allow to dry thoroughly. Treat dinghy and fenders with Aqua-Tek Vinyl-Guard to enhance appearance, protect against harmful UV rays from the sun and to prevent mould.
