

FABRI-GUARD

WATER REPELLENT, FABRIC PROTECTOR

Fabri-Guard is ideal for use on all natural and synthetic fabrics including Sunbrella fabrics, boat covers, bimini tops, canopies, awnings, backing of vinyl awnings and pop-up trailer roofs, tents, outdoor ware and footwear.

Ideal for preventing mould and mildew growth.

DIRECTIONS: Fabric must be new or freshly cleaned, totally dry and free of cleaning detergent. Pre-test for colour fastness by spraying in an inconspicuous area of the fabric until wet. Wipe with a clean white cloth. If any colour rubs off onto the cloth, do not treat the fabric. Spray evenly with a slow sweeping motion from a distance of 15 - 20 cm until evenly wet. Allow to dry. Test for repellency with a few drops of water. If water soaks into fabric, spray again.
