Roof-Tek Cleaner is a powerful cleaner that is safe and specifically designed for ALL rubber roof types. It easily cleans dirt, grime, black marks and chalky residue without damaging the existing roof treatment. Rinses easily, will not harm existing wax and manufacturer's treatments on sides or foliage on the ground.

DIRECTIONS: Sweep or hose off loose dirt and debris. Spray directly for spot cleaning or stubborn stains. Dilute 1/3 to 1/2 the bottle into a bucket of warm water for regular cleaning. Apply with sponge, mop or soft bristled nylon brush and carefully agitate or scrub as necessary in an area 1 square metre at a time. Rinse each cleaned section thoroughly to prevent redepositing of dirt on the sides of the RV. Repeat as necessary. Do not allow the solution or area being cleaned to dry until it has been thoroughly rinsed. To reduce roof chalk, grey and black streaks and to make future cleaning easier, apply Roof-Tek Treatment after cleaning.
