*Super Enzo uses the fastest, natural bacteria and enzymes to quickly eliminate odours by digesting and liquefying human waste, kitchen food waste, toilet paper and urine. It keeps holding tank and septic system components and sensors clean, improves ease of pump-outs and the bacteria continues to reproduce quickly to ensure a healthy, odour-free tank and system.*

*Super Enzo provides superior performance in all oxygen-rich and oxygen-starved system environments making it ideal for use in your cottage, country home, RV or marine holding tanks and septic systems.*

DIRECTIONS: Shake well before using. RV/Marine: Empty and flush holding tank. Black Water: After each pump-out, add one capful (30ml/1fl.oz), regardless of tank size, by flushing down the toilet. Add enough water to cover bottom of tank. Grey Water: Same dosage as above and rinse down the sink. Septic System: Add two capfuls (60ml/2fl.oz) bi-weekly or three capfuls (100ml/3fl.oz) monthly in the toilet and/or down the sink. Outhouse: Add four capfuls (120ml/½ cup) daily during periods of heavy use. Treat weekly for light use.

Avoid the use of strong cleaning chemicals and boiling water.
