Ultra Hull Cleaner works on contact to safely, quickly and effectively remove algae, greasy and oily residue, stubborn black and brown stains, rust stains, scum, zebra mussels and barnacles from fiberglass and bare aluminum boat hulls and pontoons. This odourless, non-fuming hull cleaner will not harm painted trailers, plastic lights, fenders, wiring, asphalt or concrete. The thickened formula is ideal for scum lines and reduces run-off.

DIRECTIONS: Power wash or hose off loose debris. Apply Ultra Hull Cleaner with a sprayer, roller or brush and allow to stand for up to 1-2 minutes. Heavily stained surfaces may require additional contact time. Brush gently and rinse thoroughly. If hull is not completely clean, repeat the process and increase the contact time. After use, flush sprayers and nozzles with water. For vertical surfaces, work from the bottom up. Avoid contact with fabric, galvanized metal and antifouling paint. Use on surfaces that are cool to the touch only.
